

Connecting Africa. Accessing Global Markets.

Engage Trade Africa and Engage Services Africa connect African producers and service providers with global buyers through curated B2B matchmaking, strategic networking, and outcomes-driven trade engagements.

Join Africa's Leading Export and Services Trade Platform

Engage Trade Africa facilitates trade between Africa and the world by connecting African producers with international buyers through strategic B2B matchmaking, ongoing networking, and participation in global trade engagements.

Engage Services Africa complements this by connecting export-ready African service providers with international buyers, corporates, and institutions through a highly curated programme of pre-arranged meetings, sector roundtables, and partnership-focused engagements.

Together, the platforms create a holistic trade ecosystem, supporting both goods exports and services trade — two of the most important drivers of Africa's integration into global markets.
